## Investor Report July 2017

**Glossary:**

<b>Arrears</b>	Arrears are calculated in accordance with standard market practice in the UK. A mortgage is identified as being in arrears when, on any due date, the overdue amounts which were due on previous due dates equal, in the aggregate, one or more full monthly payments. In making an arrears determination, the servicer calculates as of the date of determination the difference between the sum of all monthly payments that were due and payable by a borrower on any due date up to that date of determination (less the aggregate amount of all authorised underpayments made by such borrower up to such date of determination) and the sum of all payments actually made by that borrower up to that date of determination. If the result arrived at by dividing that difference (if any) by the amount of the required monthly payment equals or exceeds 1 the account is deemed to be in arrears. Arrears classification is determined based on the number of equivalent full current monthly payments that have been missed. A borrower that has missed payments that in the aggregate equal or exceeding 2 monthly payments (but for which the aggregate of missed payments is less than 3 monthly payments) would be classified as being 2 to <3 months in arrears, and so on.
<b>Monthly Constant Pre-Payment Date (CPR)</b>	Monthly CPR on any portfolio calculation date means the total unscheduled principal receipts received during the period of one month ending on that calculation date divided by the aggregate current balance of the loans comprised in the portfolio as at the immediately preceding calculation date. Unscheduled Principal Repayments comprise payments from TSB for the repurchase of loans from the portfolio, and capital repayments and redemptions other than those received at the expected term end date of the loan. These are annualised using the formula: $1 - ((1 - M)^{12})$ where M is the monthly CPR expressed as a percentage. Where there has been portfolio transfers within the month, CPR is calculated on a weighted average basis.
<b>Monthly Principal Payment Rate (PPR)</b>	Monthly PPR on any portfolio calculation date means the total scheduled and unscheduled principal receipts received during the period of one month ending on that calculation date divided by the aggregate current balance of the loans comprised in the portfolio as at the immediately preceding portfolio calculation date. Where there has been portfolio transfers within the month, PPR is calculated on a weighted average basis. These are annualised using the formula: $1 - ((1 - M)^{12})$ where M is the monthly PPR expressed as a percentage.
<b>Quarterly Average CPR/PPR</b>	The average of the three most recent monthly annualised CPR / PPR expressed as a percentage.
<b>Current Balance</b>	Means, in relation to any loan at any date, the aggregate balance of the loan at such date (but avoiding double counting) including: (a) the Initial Advance; (b) any increase in the principal amount of a loan due to any further advance; (c) capitalised expenses; (d) capitalised interest; and (e) all expenses charges, fees, premium or payment due and owing by the borrower which have not yet been capitalised (including accrued interest, arrears of interest, high loan-to-value fees, insurance premiums, booking fees and valuation fees), in each case, relating to such loan less all prepayments, repayments or payments of any of the foregoing made on or prior to such date, and, in relation to the portfolio, the aggregate of the Current Balances of each loan in the portfolio.
<b>Mortgage Collections</b>	All cash receipts on a mortgage within the portfolio excluding monies paid by TSB in respect of loans repurchased from the portfolio.
<b>Non-indexed LTV</b>	The aggregate current balance of all sub-loans within a mortgage account divided by the value of the property securing the loans in that mortgage account at the date of the latest lending.
<b>Loan Seasoning</b>	The number of months since the date of origination of the sub-loan.
<b>Remaining Term</b>	The number of remaining months of the term of each sub-loan.
<b>Indexed LTV</b>	The aggregate current balance of all sub-loans within a mortgage account divided by the indexed valuation of the property securing the loans in that mortgage account at the reporting date.
<b>Indexed Valuation</b>	Indexation is applied on a regional basis to property valuations on a quarterly basis in January, April, July and October of each year using the Halifax House Price Index published by Markit Group Limited.
<b>Geographic Analysis</b>	The geographic analysis is prepared based on the Economic Planning Regions.
<b>Weighted Average (WA)</b>	Unless otherwise stated all weighted average calculations are weighted by current balance.

**Footnotes:**

- <sup>(1)</sup> The reported trigger disclosed is the next trigger point - there may be subsequent triggers and these are detailed in the relevant swap agreement.
- <sup>(2)</sup> The data relates only to the cover pool swaps and excludes the covered bond swaps.
- <sup>(3)</sup> For full description of requirements please refer to the Prospectus.
- <sup>(4)</sup> A(a) is calculated as the lower of (i) the current balance of the loan, and (ii) the indexed valuation of the loan multiplied by 0.75 for non-defaulted loans, 0.4 for defaulted loans with iLTV<=75%, 0.25 for defaulted loans with iLTV>75%.  
A(b) is calculated as the Asset Percentage multiplied by the lower of (i) the current balance of the loan, and (ii) the indexed valuation of the loan multiplied by 1 for non-defaulted loans, 0.4 for defaulted loans with iLTV<=75%, 0.25 for defaulted loans with iLTV>75%.
- <sup>(5)</sup> The bank account balance has been adjusted to include cash from assets collected on the last day of the month and passed to the vehicle on the first day of the following month.
- <sup>(6)</sup> The balance reported is the amount required to be posted under item X (Set off risk) of the Asset Coverage Test.
- <sup>(7)</sup> The nominal level of over collateralisation includes cash held on the principal ledger.
- <sup>(8)</sup> The Constant Default Rate is not applicable to revolving programmes.
- <sup>(9)</sup> Unscheduled interest is recorded as 'not reported' as all unscheduled collections are treated as principal.
- <sup>(10)</sup> The data in these tables have been calculated at account level. All other stratification tables are calculated at loan level. A mortgage account consists of one or more loans secured, by way of equal ranking first charge, on the same property and thereby forming a single mortgage account.
- <sup>(11)</sup> Margins are reported based on the index rate, therefore fixed are reported at the fixed rate, trackers are reported over BBR (0.25%) and variable over SVR (2.25%).
- <sup>(12)</sup> The initial rate is considered to be the same as the current rate.
- <sup>(13)</sup> The Arrears breakdown table excludes accounts in possession.
- <sup>(14)</sup> The analysis of Repayment Type has been performed at loan level and therefore there are no balances shown as part-and-part.
- <sup>(15)</sup> Data on second homes has not historically been collected / retained on the TSB system.
- <sup>(16)</sup> Reported at the account level. A mortgage account consists of one or more loans secured, by way of equal ranking first charge, on the same property and thereby forming a single mortgage account.
- <sup>(17)</sup> In the case of joint accounts the employment status disclosed is that of the first named borrower and does not reflect the status of other borrowers named on the same account.
- <sup>(18)</sup> This category includes historical accounts where data was not captured on the system.
- <sup>(19)</sup> The date stated is the legal final maturity date as it applies to the Issuer, however the extended final maturity date as it applies to the LLP is 12 months following this date.
- <sup>(20)</sup> The waterfall reported is that which will be made in the next calendar month.
- <sup>(21)</sup> Item B of the Asset Coverage Test excludes principal balances distributed back to the Seller in the next calendar month.
