Glossary:

| Arrears | Arrears are calculated in accordance with standard market practice in the UK. A mortgage is identified as being in arrears when, on any due date, the overdue amounts which were due on previous due dates to qual, in the aggregate, one or more full monthly payments. In making an arrears determination, the service calculates as of the date of determination (less the aggregate amount of all authorised underpayments made by such borrower up to such date up to that date of determination) and the sum of all payments actually made by that borrower up to that date of determination. If the result arrived at by dividing that difference (if any) by the amount of the required monthly payment equals or exceeds 1 the account is deemed to be in arrears. Anrears classification is determined based on the number of equivalent full current monthly payments (but for which the aggregated of missed payments is less than 3 monthly payments) would be classified as being 2 to <3 months in arrears, and so on. |
|---|---|
| Monthly Constant Pre-Payment Date (CPR) | Monthly CPR on any portfolio calculation date means the total unscheduled principal receipts received during the period of one month ending on that calculation date divided by the aggregate current balance of the loans comprised in the portfolio as at the immediately preceding calculation date. Unscheduled Principal Repayments comprise payments from TSB to the repurchase of loans from the portfolio, and capital repayments and redemptions other than those received at the expected term end date of the loan. These are annualised using the formula: 1-(f1-M)M*2) where M is the monthly CPR expressed as a percentage. Where there has been portfolio transfers within the month, CPR is calculated on a weighted average basis. |
| Monthly Principal Payment Rate (PPR) | Monthly PPR on any portfolio calculation date means the total scheduled and unscheduled principal receipts received during the period of one month ending on that calculation date divided by the aggregate current balance of the loans comprised in the portfolio as at the immediately preceding portfolio calculation date. Where there has been portfolio transfers within the month, PPR is calculated on a weighted average basis. These are annualised using the formula: 1-((1-M)^12) where M is the monthly PPR expressed as a percentage. |
| Quarterly Average CPR/PPR | The average of the three most recent monthly annualised CPR / PPR expressed as a percentage. |
| Current Balance | Means, in relation to any loan at any date, the aggregate balance of the loan at such date (but avoiding double counting) including: (a) the Initial Advance; (b) any increase in the principal amount of a loan due to any further advance; (c) capitalised expenses; (d) capitalised expenses; (d) capitalised interest; and (e) all expenses charges, fees, premium or payment due and owing by the borrower which have not yet been capitalised (including accrued interest, arrears of interest, high loan-to-value fees, insurance premiums, booking fees and valuation fees), in each case, relating to such loan less all prepayments, repayments of any of the foregoing made on or prior to such date, and, in relation to the portfolio, the aggregate of the Current Balances of each loan in the portfolio. |
| Mortgage Collections | All cash receipts on a mortgage within the portfolio excluding monies paid by TSB in respect of loans repurchased from the portfolio. |
| Non-indexed LTV | The aggregate current balance of all sub-loans within a mortgage account divided by the value of the property securing the loans in that mortgage account at the date of the latest lending. |
| Loan Seasoning | The number of months since the date of origination of the sub-loan. |
| Remaining Term | The number of remaining months of the term of each sub-loan. |
| Indexed LTV | The aggregate current balance of all sub-loans within a mortgage account divided by the indexed valuation of the property securing the loans in that mortgage account at the reporting date. |
| Indexed Valuation | Indexation is applied on a regional basis to property valuations on a quarterly basis in January, April, July and October of each year using the Halifax House Price Index published by Markit Group Limited. |
| Geographic Analysis | The geographic analysis is prepared based on the Economic Planning Regions. |
